FOR IMMEDIATE RELEASE:

BLACKSTONE-NEY ULTRASONICS INTRODUCES NEW CLEANING SOLUTIONS AT MD&M WEST 2017

February 1, 2017 – Cincinnati, OH

Blackstone-NEY Ultrasonics, a world leader in providing cleaning and waste minimization technologies, will introduce a host of advanced cleaning solutions at the MD&M West 2017 in Anaheim, California February 7 - 9, 2017. Visitors to Blackstone-NEY Ultrasonics Booth #544 will be introducing a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **The New Blackstone-NEY Ultrasonics Modular Aquarius™ Cleaning System:** An innovation in aqueous parts cleaning, offering a modular plug & play configuration, Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that are easily integrated to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide the exact cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies 40, 72, 104 kHz in each tank, Siemens controller, automated hoist transfer system, and much more. Additional modules can be added at any time allowing for future expandability, while offering an intuitive user interface.

- **PROHT Sonic Tank:** Ultrasonic cleaning tanks and housings are constructed of stainless steel with a Duplex Stainless transducer radiating surface to significantly extend transducer life. PROHT tanks are available in sizes ranging from 12" by 6" through 36" by 24" and offer the same cleaning capabilities as more elaborate systems at a lower price. They are ideal for laboratory as well as entry-level through small scale production cleaning. The compact design fits easily on a workbench or can be installed as a bench top drop-in. A digital ultrasonic timer and temperature control are standard features of the new PROHT design.

We will have technical experts available at the show to explain our technologies more in-depth and to provide suggestions to our customers for improving their cleaning processes.
