## FOR IMMEDIATE RELEASE:

### BLACKSTONE-NEY ULTRASONICS INTRODUCES NEW CLEANING SOLUTIONS AT OMTEC 2016

*June 2016 – Cincinnati, OH*

Blackstone-NEY Ultrasonics, a world leader in providing cleaning and waste minimization, technologies will introduce a host of advanced cleaning solutions at the OMTEC 2016 in Chicago, IL June 15 – 16, 2016. Visitors to Blackstone-NEY Ultrasonics booth #709 will be introducing a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **The New Blackstone-NEY Ultrasonics Modular Aquarius™ Cleaning System:** An innovation in aqueous parts cleaning, offering a modular plug & play configuration, Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that can easily be integrated together to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide the exact cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies 40, 72, 104 kHz in each tank, Siemens controller, automated hoist transfer system, and much more. Additional modules can be added at any time allowing for future expandability, while offering an intuitive user interface.

- **PROHT Sonic Tank:** Also known as the "Benchtop Series" is an entry-level benchtop ultrasonic cleaning system comprised of all stainless steel construction. Available in various sizes and intended to sit easily on a workbench or as a drop-in, these parts washers offer the same cleaning capabilities as the more elaborate models at a lower price. They are an excellent tool for cleaning small parts on an intermittent to semi-production basis (they are not recommended for high volume cleaning). These tanks are available for use with single or multi-frequency generators.

We will have technical experts available at the show to explain our technologies more in-depth and to provide suggestions to our customers for improving their cleaning processes.
